Digital Transformation in Education

Problem Statement:

Study the current trends and adoption levels of latest technologies in education industry and challenges faced thereof, as part of this study we also evaluate how learning footprint can be further expanded using digital means

Assessment of Digital Transformation in Education

What is the significance of IT infrastructure in achieving strategic goals?

- IT Infrastructure role is pivotal in meeting strategic goals for education sector as it enables technology which is an effective way to promote a healthy educational system worldwide.
- Internet and broadband connectivity is the key. It makes learning more accessible, exciting, and enjoyable.
- The development of IT infra and technological advancements in education leads to enhanced knowledge and skills of students.

How ambitious are country/ industry approach to digital technologies?

- Worldwide all countries want to move the dial in the right direction, penetration of education to all class of society is a universal goal along with inclusivity and diversity.
- Digital medium can accelerate the reach and adoption of education, this has proven itself right as we notice that Education is making up more than 6% of global GDP.
- The global online education market **grew to USD 250 billion** in 2020 from less than USD 190 billion in 2019.

How “Digital” is current interface to the audience/ customer?

- 3.6 billion people still have no access to the Internet and about 258 million children are out of school. For those enrolled and attending school, the COVID-19 pandemic created an unprecedented challenge, forcing 94 percent of learners worldwide to continue their education at home.
- According to global market research insights, online education has been projected to grow up to **USD 586 billion** by 2027.

How will revenue get generated from future business operations?

- Faster and personalized experience in urban areas and expansion in rural gives wider scope for revenue generation for interested organizations.
- A large share of revenue generation may come with smaller margins, yet deep penetration & reach, especially in developing countries and continents.

What will be the future business scope of the education sector

- Faster, affordable, financially viable, sustainable and personalized solutions
- Expansion in rural areas
- Leveraging latest technologies IOT, Block Chain and Big Data
- Augmented reality and virtual reality to give personalized and real time experience
- Online Classes, Smart Classrooms, Analytics and AI to give personalized learning experiences

Who should take charge of the digital transformation endeavour?

- Government of respective countries will be the key enabler to build easier and good policies and encourage digitization
- Public Private Partnership model can be a game changer here with government giving incentives to public companies in various shape and form

Main areas of Digital Transformation

Campus environment:

- Contactless attendance
- Facial recognition through camera images
- Auto detection of free courts in play areas through thermal screening

Learning Environment

- Online assessments
- Virtual on boarding
- AR/ VR/ 4D to create enhanced learning experience
- Adaptive learning- personalizing assessments basis student performance
- Learning apps/ platform – provides learning content
- Chatbots- allowing easy navigation through lectures and assessments

Teaching Methods

- Smart classroom
- Digital white board
- AI driven online assessments
- AI-enabled remote proctoring

Traditional v/s Digital Education Comparison

Traditional Learning Advantages/ Disadvantages

Advantages:

- Interactive/ Expression of Opinions
- Practical/ Hands-on-training
- Development of social skills
- Extracurricular activities and inculcating leadership skills

Disadvantages:

- No flexibility/ Time bound
- Limited number of students
- Additional cost of textbooks/ transport/ activities etc.
- Reliance on lectures & notes from the teachers resulting in less/ no research by students

Digital Learning Advantages/ Disadvantages

Advantages:

- Provides flexibility
- Access to study material/ lectures on demand
- Access to all kind of courses/ competent teachers from home
- Higher degree of ownership

Disadvantages:

- Requires high-quality internet connection
- Requires lot of self discipline
- Challenges in acquiring social skills
- Practical knowledge/ understanding required in certain fields like agriculture, medical etc. is missing

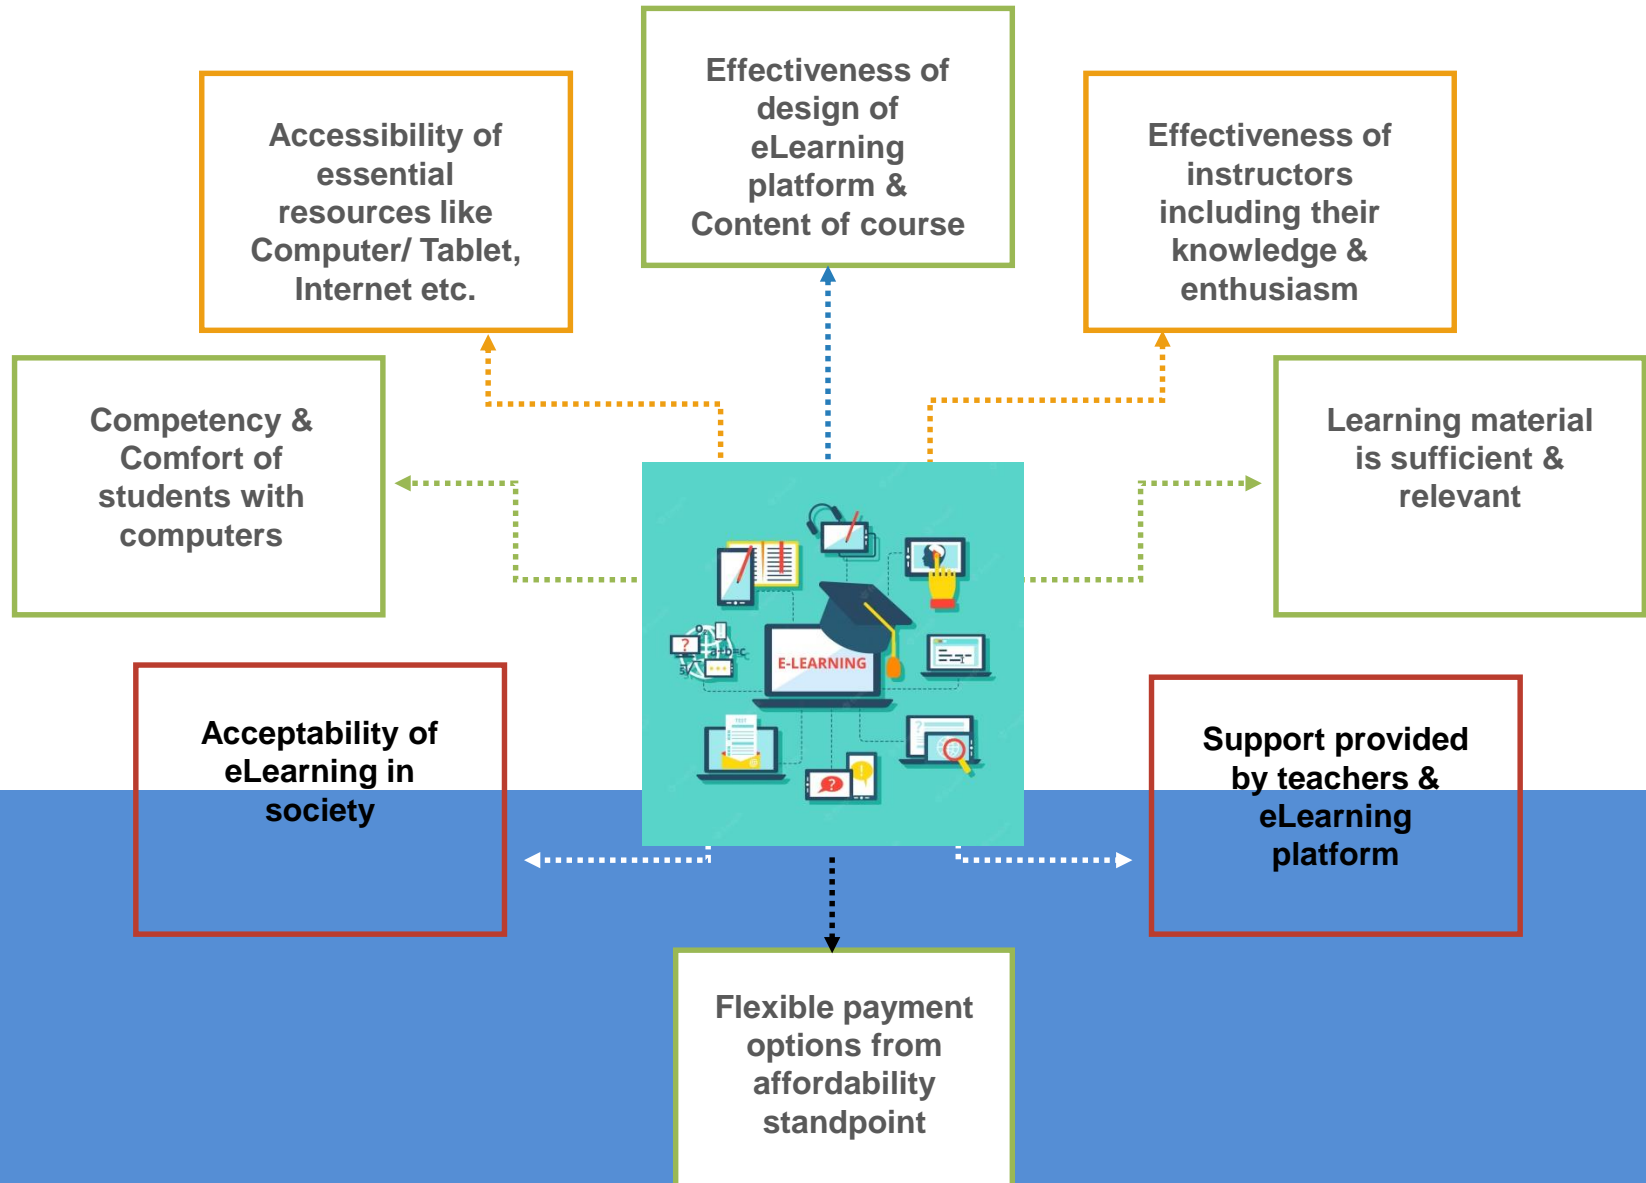

Exponential Growth in online education – an example (Coursera enrollment)

More learners are accessing online learning

The demand for online learning on Coursera continues to outpace pre-pandemic levels.

Critical Success Factors

Online learning is now a worldwide phenomenon

Conclusion

Challenges/ Opportunities

Challenges/ Opportunities:

- High quality affordable Internet is one of the biggest issue. Penetration of internet is at 47% in India which is the second highest in terms of Internet usage
- More research and innovation is required In higher education or streams where practical experience is required like agriculture & medical science
- In the field of learners with special needs like dyslexic, blind & deaf learners.

Future Trends in Education Industry

Innovations that will address most of the challenges listed above.

- Immersive technologies + Metaverse + Gamification
- A la carte learning
- Hybrid learning will grow
- Personalized learning/ apps catering to students with special needs
